Re: AHJ Engineers, PC
Letter of Recommendation

To Whom It May Concern:

It is with pleasure and confidence that I write this letter of recommendation on behalf of Keith Jones, PE/SE, Dave Haugland, PE/SECB/LEED AP, and AHJ Engineers, PC for any and all structural engineering services you may be considering.

Erstad Architects has been providing architectural design services to a wide range of both public and private clients since 1998, and we have relied on AHJ's expertise on a majority of our projects during that time. Keith and his team have provided structural engineering analysis, design, construction documentation and construction administration services on both large and small projects for us. We have always found them to be highly competent and consistent in the high level of service they provide.

Keith and his team of professionals have proven themselves time after time for their willingness to help solve problems and to provide reasonable, cost effective and functional design solutions to complex engineering challenges. Their technical expertise is unsurpassed in our region, and their familiarity with a wide variety of structural systems and construction techniques, both old and new, have proven them to be an invaluable member of our team. AHJ Engineers, PC strives to be upfront when faced with challenges, and is always willing to go the extra mile to get the job done right. Their integrity and honesty is much appreciated in a challenging industry, and the trust we have in them is well earned.

We sincerely believe that you will be well served by Keith, Dave, and the fine people at AHJ Engineers, PC. We look forward to many years of continued collaboration with AHJ Engineers primarily due to their consistently excellent service and personnel.

If you have any questions, please do not hesitate to contact us.

Sincerely,
erstad ARCHITECTS

David Ruby, AIA
