Reference Letter for Keith Jones

To whom it may concern,

I am pleased to have been asked to write a letter of reference or recommendation for Keith Jones relative to his capabilities as a structural engineer. Without reservation I can say that Keith is one of the best structural engineers with whom I have had the opportunity to work with over my 30 years in the practice of architecture. Not only is Keith a fine structural engineer, he is a great person professionally and personally. He is a "true team player" who is truly dedicated to our client's best interests. He is honest, trustworthy and a pleasure to work with.

Keith's approach to our projects, especially the renovation and addition projects involving existing / historic structures is practical and sympathetic to the design renovation efforts being accomplished. He is innovative and progressive in his approach while maintaining a conservative nature relative to the structural integrity of our projects. Keith's design work is both cost conscious in his fees as well as the systems designed.

I have had the pleasure of working with Keith on many projects across southeastern Idaho and western and southern Wyoming. Keith has been accessible and very responsive to the projects no matter the location. We appreciate his dedication and service to Myers Anderson and especially our clients.

Be it a new multi-million dollar facility or a messy little renovation, Keith is most capable and effective and is a first choice on our list of consultants, I recommend him highly.

If I can be of further assistance or there are any questions please do not hesitate contacting me.

Sincerely,

Jerry T. Myers, A.I.A., NCARB
