AHJ Engineers, P.C.
9751 W. Chinden Blvd., Suite 200
Garden City, ID 83714

To Whom It May Concern:

This letter serves as formal commendation for AHJ Engineers. We have worked with AHJ Engineers on both public works and private construction projects. Their professionalism, response time, constructability knowledge and acceptance of "suggested" modifications to their engineering design has been outstanding. Often times, we encounter engineering firms who will not accept (or even review) other ideas when field issues arise. We are told to "build it as designed".

AHJ Engineers understands that construction is a process involving many stakeholders. A successful project results from all parties being "flexible" with their design and engineering requirements to achieve the end goal. We highly recommend AHJ Engineers for any projects your company may be considering. In addition, we look forward to more successful projects between AHJ Engineers and Hellmann Construction Co. Inc..

Regards,

Eric R. Hellmann
Operations Manager
